In algebraic topology, it is a cohomology theory known as topological K-theory. In algebra and algebraic geometry, it is referred to as algebraic K-theory. It is also a fundamental tool in the field of operator algebras. It can be seen as the study of certain kinds of ... Thu, 06 Dec 2018 13:10:00 GMT K-theory - Wikipedia - C*-algebras (pronounced "C-star") are an area of research in functional analysis, a branch of mathematics. A C*-algebra is a complex algebra A of continuous linear operators on a complex Hilbert space with two additional properties: . A is a topologically closed set in the norm topology of operators.; A is closed under the operation of taking adjoints of operators.
